LECTURE NOTES ON  
STATISTICAL DECISION THEORY

I

Dnipro  
2021

Lecture notes provide basic introduction to Statistical Decision Theory on the following themes: Linear Programming, Elements of Game Theory, and Optimal Statistical Decisions.

Notes are intended for students that study Statistical Decision Theory and anyone who wants to acquaint themselves with the subject.

# Content

<b>Origin(s)</b>	<b>4</b>
<b>Introduction</b>	<b>5</b>
<b>1. Linear programming</b>	<b>8</b>
1.1. Convex sets and elements of convex analysis . . . . .	11
1.2. Behaviour of target function on admissible domain . . . . .	20
1.3. Standard form of LPP and base solutions . . . . .	21
1.4. Canonical form of LPP and Jordan-Gauss exclusion method . . . . .	23
1.5. Simplex Method, Optimality Criterion, Unboundedness Indicator . . . . .	24
1.6. Dual (adjoint) LPP . . . . .	30
<b>2. Elements of Game Theory</b>	<b>32</b>
2.1. Matrix games and saddle points . . . . .	33
2.2. Mixed strategies . . . . .	35
2.3. Properties of optimal strategies . . . . .	39
2.4. Simplification of matrix games . . . . .	40
2.5. Matrix Games and Linear Programming . . . . .	42
2.6. Structure of solutions of a matrix game . . . . .	42
2.7. Bimatrix games . . . . .	43
2.8. Positional games . . . . .	47
<b>3. Optimal Statistical Decisions</b>	<b>49</b>
3.1. Bayes Risk, Bayes Decisions . . . . .	49
3.2. Mixed decisions . . . . .	50
3.3. Criteria of Decision Making under Indeterminacy . . . . .	52
3.4. Statistical Decision Making Problems . . . . .	54
3.5. Conjugate families of distributions . . . . .	58
3.6. Bayes Estimators . . . . .	62
<b>“And the future has passed”</b>	<b>66</b>
<b>Abbreviations</b>	<b>68</b>
<b>References</b>	<b>68</b>
